

# AT&T 5G Cell Booster Pro

Experience consistent, high-quality wireless coverage throughout your workplace

## Benefits

- Coverage—on-premises business-ready 5G
- C-band (a form of radio spectrum that enables fast speeds on a wide scale) wireless network—offers coverage and performance
- Connectivity—effortless wireless communication and messaging
- Efficiency—increase your productivity while using wireless devices
- Flexibility—move or add 5G Cell Booster Pro devices to expand or change coverage areas
- Payment options—choose a one-time charge or device installment plan option

## Features

- Self-installs easily or opt for professional installation
- Mobile app and online portal for monitoring, managing, and reporting
- 24/7 device support

## More wireless coverage for your business

Your business needs reliable 5G wireless coverage in your workplace to communicate with your customers, suppliers, and team members. Unfortunately, even today's most robust 5G signal may be no match for some geographical features or building structures that can weaken the strength and reduce the range of the cellular signal inside your workplace. When that happens, employee productivity and customer experience suffer. AT&T 5G Cell Booster Pro is an easy-to-implement solution to help with those connectivity issues.

## What is AT&T 5G Cell Booster Pro?

AT&T 5G Cell Booster Pro is a mini cell tower that creates AT&T 5G+ C-band coverage inside your workplace. AT&T 5G and 4G devices, including Band 14 devices, automatically connect to your 5G Cell Booster Pro device to establish a reliable connection for critical communication and transactions. You can turn dead zone areas in your building into reliable communication hubs.

## 5G coverage for your workplace

Each 5G Cell Booster Pro device delivers coverage for an area up to 15,000 square feet. The device supports up to 64 simultaneous communication sessions, including 32 5G+ C-band connections and 32 4G LTE connections. Need to cover more than 15,000 square feet? You can activate up to six (6) 5G Cell Booster Pro devices in your building. This means you can expand your total coverage area up to 90,000 square feet for up to 384 concurrent communication sessions. That's 192 5G+ C-band connections and 192 4G LTE connections for AT&T 5G and 4G devices. This includes Band 14 and IoT devices.

IoT devices with the technologies: CAT-M, LTE-M, NB-IoT, and RedCap are not compatible with the AT&T 5G Cell Booster Pro device.

## Built for business

### Broadband requirements

The AT&T 5G Cell Booster Pro device connects to an available 1G port on your broadband router or switch. Your broadband needs to meet the following specifications to provide the transport to optimize business-ready 5G coverage in your workplace:

| Recommended<br>broadband downlink | Recommended<br>broadband uplink |
|-----------------------------------|---------------------------------|
| 1 GB or higher                    | 100 Mbps or higher              |

Downlink speeds of 100 Mbps & Uplink speeds of 25Mbps or higher are the minimum bandwidth speeds required for the AT&T 5G Cell Booster Pro device.

The number of AT&T 5G Cell Booster Pro devices, your site's maximum broadband speed, the number of simultaneous user sessions, and the session type (voice, data, streaming) all influence AT&T 5G Cell Booster Pro performance.

[Use this link](#) to verify your broadband's current downlink and uplink speeds.

We recommend pairing AT&T 5G Cell Booster Pro with AT&T Business Fiber or AT&T Dedicated Internet (ADI) where available to get the best connectivity.

AT&T 5G Cell Booster Pro is available only for U.S. business locations that have 4G LTE or 5G+ C-band coverage.

### Industry-standard encryption

A highly secure Internet Protocol Security (IPSec) tunnel contains all IP traffic traveling between the AT&T 5G Cell Booster Pro and AT&T's secure core network. Cell Booster Pro uses industry-standard encryption techniques and algorithms, including Advanced Encryption Standard (AES), Triple Data Encryption Standard, and commercial algorithms. 5G Cell Booster Pro complies with AT&T security policies described in the [corporate certification document](#).

## Simple to install

AT&T 5G Cell Booster Pro is designed for businesses that need an easy-to-deploy coverage solution. Many customers install AT&T 5G Cell Booster Pro themselves. But if you prefer not to add to your to-do list, you can opt for AT&T professional installation service.

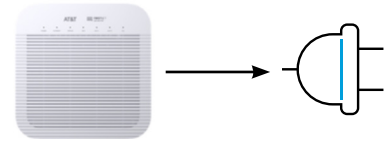

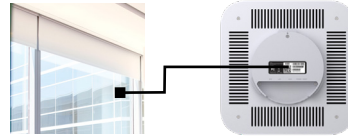

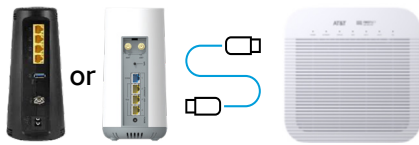

AT&T 5G Cell Booster Pro service includes an online portal accessible through your web browser. There's also a free mobile app available in the Google Play and Apple app stores. The portal lets you easily register your AT&T 5G Cell Booster Pro devices by scanning a QR code to activate your service. You can use the portal to check the service status of 5G Cell Booster Pro devices at any of your locations.

**We've been connecting and growing businesses for nearly 150 years.**

## Easy to use

What do you need to do to enable your AT&T 4G and 5G capable devices to connect to the AT&T 5G Cell Booster Pro? Nothing. Your AT&T devices, including phones, tablets, wearables, or other devices with an AT&T SIM, automatically connect when in your 5G Cell Booster Pro device coverage area.

### Connect to broadband

- Connect your AT&T broadband router to your AT&T 5G Cell Booster Pro WAN port to create a data transport for the cellular traffic

### Place and connect antenna

- Insert the GPS antenna into the GPS port on the backside of the device
- Place the GPS antenna onto an exterior window to obtain and maintain a 5G signal

### Connect device to power

- Connect the AT&T 5G Cell Booster Pro device to a power source using the provided power supply
- Your AT&T 5G Cell Booster Pro admin receives email notification of service activation
- AT&T 5G and 4G-LTE capable devices automatically connect to the coverage created

Create more wireless coverage for your business with AT&T 5G Cell Booster Pro.

## Why AT&T Business?

See how ultra-fast, reliable fiber and 5G connectivity protected by built-in security give you a new level of confidence in the possibilities of your network. Let our experts work with you to solve your challenges and accelerate outcomes. Your business deserves the AT&T Business difference—a new standard for networking.

Contact your AT&T Business expert or visit our website to learn more about AT&T 5G Cell Booster Pro.

**ADDITIONAL TERMS AND CONDITIONS:** The AT&T 5G Cell Booster Pro requires and is subject to a qualified AT&T wireless service agreement that includes, without limitation, the Additional Service and Equipment-Related Terms found at [att.com/abs-addtl-terms](http://att.com/abs-addtl-terms) or comparable provisions (Business Agreement or Customer Subscriber Agreement, both hereafter referred to as Business Agreement). Cell Booster Pro System (System) offers voice and data wireless connectivity for indoor areas with no or poor AT&T wireless coverage. Requires customer provided broadband internet service with minimum of 100 Mbps downlink and 25 Mbps uplink, corded access from the device to an exterior window to provide a constant GPS connection, and an available 1Gig Port on the Customer's broadband Router/Switch. AT&T Cell Booster Pro may not be used in any manner prohibited by your Business Agreement (see prohibited network uses/activities at [att.com/abs-addtl-terms](http://att.com/abs-addtl-terms) or the comparable portion of your Business Agreement and [att.com/aup](http://att.com/aup)).

**AVAILABILITY:** 5G Cell Booster Pro is available within the AT&T domestic 5G+ or 4G LTE wireless license footprint. Coverage not available everywhere and subject to change without notice. See <https://www.att.com/support/article/wireless/KM1452148/> for details.

**SERVICE RESTRICTIONS:** 5G Cell Booster Pro may not be used at any address other than its registered service address without re-registration in the 5G Cell Booster Pro portal. 5G Cell Booster Pro will not operate at a location other than its registered service address. No more than six 5G Cell Booster Pro devices may be used at a single location. Service, features, availability, pricing, terms, restrictions & conditions subject to change & may be modified, discontinued or terminated at any time without notice.

**DEVICES:** Each 5G Cell Booster Pro supports up to 64 simultaneous mobile device connections on active qualified AT&T Mobility 5G and 4G LTE rate plans. Cell Booster Pro does not support CAT-M, LTE-M, NB-IoT, or RedCap devices.

**THROUGHPUT:** 5G Cell Booster Pro performance is impacted by the number of 5G Cell Booster Pro devices at a location, the site's available broadband speed, the number of simultaneous user sessions and the type of session (voice, data, streaming).

**PRICING:** 5G Cell Booster Pro device pricing and monthly recurring service charge and additional information can be found at [www.att.com/cellboosterpro](http://www.att.com/cellboosterpro). AutoPay & Paperless Bill Discount: Not applicable. Business Agreement Discounts: Cell Booster Pro is not eligible for any CRU service discount described in your Business Agreement.

**OTHER RESTRICTIONS & FEES:** If you purchased a device that requires a service term commitment, you may be required to pay the outstanding balance on the 5G Cell Booster Pro device if you cancel service after the first 30 days & before your service term ends. Credit approval may be required. AT&T reserves the right to suspend or terminate Cell Booster Pro if used in any manner prohibited by your Agreement.

**ADDITIONAL MONTHLY FEES & TAXES:** Monthly AT&T fees apply per line & include Regulatory Cost Recovery Fee (up to \$1.50), Administrative Fee (up to \$1.99), Property Tax Allotment Fee (\$0.20-\$0.45) & other AT&T fees which are not government-required. Additional one-time AT&T fees may apply. Govt. taxes are extra. See [att.com/mobilityfees](http://att.com/mobilityfees) for more details.
