

AT&T Business Buyback™

It's an easy decision that delivers surprising benefits

Companies that send us their unused devices receive credit to use for their monthly statement or to acquire new equipment!

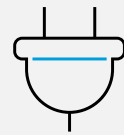

**Monthly
Statement**

**New
Devices**

Accessories

And recycling helps the environment! For every 1000 devices recycled:

1200 gallons
of water are not polluted

449 pounds
of e-Waste don't end up in a landfill

We are committed to responsible electronics recycling and have a zero-landfill policy. We aim to divert nearly all waste away from landfills.

It's a simple process that delivers big value

1

Go to attbusinesstradein.com and enter the devices to be exchanged. We'll assign a value to them and, if you accept the quote, we will send you shipping materials

2

Transfer your data to a new device and disable "Find My iPhone" or "Find My Mobile" (Android). Remove any MDM. Value will be reduced if access locks are not turned off.

3

Ship your device within 30 days of accepting the quote. Credit will be applied to account within 3 billing cycles from the date we receive your old devices.

A certificate of destruction and erasure is available upon request.

If you want more information about the AT&T Business Trade-in® program, please call 1-800-331-0500.
